PROFILE

I am a recent graduate with a Bachelors degree in Computer Science. Throughout my academic journey, I have developed a strong foundation in programming, and problem-solving. My goal is to design and develop modern, user-friendly, and responsive websites and mobile applications while continuously improving my technical expertise.

EDUCATION

Bachelor of Science in Computer Science

National College of Business Administration & Economics
(Nov 2022-May 2026)

PROJECT

Weather App (React JS)

Built a responsive weather app using React JS with real-time weather data integration via API and React Hooks for state management.

Currency Converter App (React Native)

Developed a mobile currency converter app using React Native with live exchange rate API and dynamic conversion functionality.

E-Commerce Website (HTML, CSS, JavaScript)

Created a responsive frontend e-commerce website with product listings, product details, and cart functionality.

To-Do List App (React JS)

Built a task management web app using React JS with add, edit, delete, and complete task features using React Hooks.
